Abstract

Core socialist values are the common pursuit of values of all the people and the strategic requirement for the great rejuvenation of the Chinese nation. The value orientation of the young students determines the value orientation of the future society. Therefore, it is of great significance to strengthen the core socialist values of college students and train the new people who can play the role of national rejuvenation to study the construction path.

Keywords

College students; Socialist core values; Construction of the path.

1. Introduction

Core socialist values are the kernel of the socialist core value system. The CPC central committee with comrade Xi Jinping at its core put forward the major strategic thought on socialism with Chinese characteristics in the new era. The 18th CPC central committee put forward the socialist core values at the three levels of state, society and citizen, which cover 24 characters. In December 2013, the general office of the CPC central committee issued the opinions on cultivating and practicing core socialist values, which strictly stipulated the core socialist values based on the "three initiatives" from the institutional level. In December 2014, general secretary Xi Jinping proposed during his survey in Jiangsu that to do all kinds of work well, we must have the support of strong value guiding force, cultural cohesion and spiritual driving force, so that the core socialist values will become a strong driving force to guide people forward. The 19th, put forward to cultivate and practice the socialist core values, to cultivate new bear his national rejuvenation era for the starting point, to strengthen the education guide, practice cultivation, system guarantee, play to the socialist core values of national education, building spiritual civilization, the spread of the spiritual and cultural products creative production leading role, the socialist core values into all aspects of social development, into people's emotional identity and behavior. The fourth plenary session of the 19th CPC central committee put forward the system of cultural construction guided by socialist core values. Core socialist values have become a concentrated embodiment of guiding social development and progress and holding together the Chinese spirit.

Colleges and universities are not only the builders and successors of the socialist cause of the all-round development of morality, intelligence, physique, aesthetics and labor, but also the core socialist values of the cultivation and practice of college students, so that the values into the daily life of college students in an important position. Contemporary college students shoulder the great mission of national rejuvenation. Along with economic globalization and value diversification, college students, as a special group, are susceptible to various ideological trends. General secretary Xi Jinping has also pointed out that the value orientation of youth determines the value orientation of the whole society in the future. It is enough to prove the importance of positive and healthy values to college students' self-healthy growth

and even to the development of the whole society. Therefore, it is necessary to run the core socialist values through all aspects of higher education, pay attention to the education of ideals and beliefs, cultivate patriotism, moral standards and other aspects of spiritual guidance for college students. Through social practice and voluntary service, cultivate college students' spirit of dedication. Strengthen the construction of campus culture, integrate the red culture into it, pay attention to the cultivation effect. The construction of teachers provides guidance for the cultivation of socialist core values for college students.

2. Pay Attention to the Education of Ideals and Beliefs, to Train the Great Responsibility of the New Era.

Young people have lofty ideals and firm convictions. They are the unbreakable driving force for a country and a nation. To cultivate a new era of national revival highest and need the new era of Chinese youth build up faith in marxism, socialism with Chinese characteristics of confidence, the confidence of the "China dream" for the great rejuvenation of the Chinese nation, to the masses of the people, in the new era, new world, let the ideal faith sublimation in the entrepreneurial struggle, let youth in innovation to create flash. To strengthen the core socialist values of college students must pay attention to the education of ideals and beliefs. The height and degree of college students' pursuit of ideals and beliefs determine the height of the future development of the Chinese nation and the development of the cause of socialism with Chinese characteristics. First, we will strengthen education in patriotism. Socialist core values from the civic level, the first patriotic, is a person and the motherland deep feelings of dependence. For every Chinese, patriotism is their duty and duty. It is the place where their hearts are tied and their feelings are returned. The outline for the implementation of patriotism education in the new era points out that patriotism is the national heart and soul of the Chinese nation and the most important spiritual wealth of the Chinese nation. Colleges and universities as the core of patriotism education to the student, lets the student understand patriotism standards and norms, take the rich variety of education practice, patriotic emotion recognition can be converted to real practice and behavior habit, let the patriotism thought firmly rooted in the heart, it is required that every college students so as to promote national unity, maintaining the reunification of the motherland, consciously serve as its own duty. Second, pay attention to the ideological and moral construction of college students. "Dedication, integrity and friendliness" is the condensation of the core socialist values from the level of individual behavior, covering all areas of social morality, and is the basic moral code that every citizen must abide by. The implementation outline of the construction of civic morality in the new era puts forward that schools are the important front of the construction of civic morality. We should fully implement the party's educational policy, adhere to the socialist orientation of running schools, put education first and moral education first, take ideological and moral character as the core quality of students and include them in the standards of academic quality, and build an education system for the comprehensive cultivation of moral, intellectual, physical, physical, and labor. It is necessary to constantly guide college students to combine correct moral cognition, conscious moral cultivation and positive moral practice so as to become qualified socialist builders and successors in the new era.

3. We Should Give Full Play to the Role of Social Practice in Educating People and Carry out Various Forms of Volunteer Services.

To strengthen the core socialist values of college students, we should attach importance to the practical education of young students. General secretary Xi Jinping has pointed out that the cultivation of values is like the QQ child wearing clothes. If the first button is wrong, the rest of

the buttons will be wrong. The buttons of life should be fastened well from the very beginning. Therefore, it is necessary to strengthen the cultivation of socialist core values among college students through social practice and voluntary service activities. The cultivation of socialist core values is not an overnight success. It requires long-term cultivation and education of young college students and efforts to turn core values into daily codes of conduct. First, the educational effect of innovative social practice activities. Social practice activities are regarded as "the second classroom", which is conducive to comprehensively improving the comprehensive ability and quality of college students. Colleges and universities should be responsible for carefully cultivating social practice activities, strengthening the construction of practice education base, building college students' practice education base outside school, providing schools and society with education and technology to alleviate poverty, science and technology culture "three to the countryside", green ecology, energy conservation, environmental protection, social welfare activities and other practical activities. Let college students practice socialist core values in practical activities. Second, various forms of voluntary services. Voluntary service is an important symbol of social civilization and an effective carrier to cultivate and practice socialist core values. Xi Jinping pointed out that since the party 18, the volunteers, volunteer service workers actively response to the party and the people, carrying forward and practicing the socialist core values, into the community, into the country, into the grassroots, warmth for others, make contributions to society, fully demonstrates the good ideal and faith, love, bear responsibility, become people's beliefs, national power and national promising. Under the guidance of the voluntary service system, we should constantly improve the voluntary service system for college students and youth, and become an effective force for the national governance system and governance capacity. It can better guide college students to carry forward the volunteer spirit of dedication, friendship, mutual assistance and progress, train and enhance the civic consciousness, dedication and service ability of young college students, and promote the overall moral level and scientific and cultural quality of young students. The university mobilizes various resources and forces to promote the socialization and specialization of college students' volunteer work. We will improve the mechanism for recruiting and registering volunteers, carry out targeted high-level education and training, and train key teams and professional forces. Expand the volunteer service projects and positions, strengthen the contacts inside and outside the school, and create a good environment for the development of volunteer organizations at all levels; Keep close relationship with relevant volunteer organizations inside and outside the school, learn from each other and strengthen cooperation; Expand contacts with all sectors of the community to provide voluntary services for the development of the community and the school.

4. Integrate Red Culture into Campus Culture Construction, and Strengthen the Cultivation Effect of Socialist Core Values of College Students.

Campus culture construction is an important part of the cultural construction of socialist countries, which consists of material culture construction, spiritual culture construction, system culture construction and behavior culture construction. Integrating the red culture into the campus culture construction is not only conducive to cultivating and practicing the core socialist values of college students, but also conducive to the implementation of the mission theme education. Our party's original purpose and mission is to seek happiness for the Chinese people and the rejuvenation of the Chinese nation, inspiring generations of communists to strive for it. First, the importance of red culture to the cultivation of college students' core values. Red culture is the inheritance, development and innovation of the

excellent culture of the Chinese nation. Revolutionary museum, memorial hall, party history hall, martyrs cemetery and other party and national red gene bank. We will strengthen education in revolutionary traditions, patriotism, and the ideology and ethics of young people, pass down the red gene, and ensure that the color red never changes. For a long time, the red revolution left the story of songs and tears, is an important material for the education of college students, the cultivation of college students patriotism is an important means and embodiment. Colleges and universities should fully tap local red cultural resources, rely on the use of red resources, increase in-depth research on regional red culture, and make use of the existing red historical materials and Internet big data tools to provide materials for the cultivation of college students' core values. Secondly, red culture is used to cultivate college students' outlook on life and values. The communist party of China has formed the Jing - gangshan spirit, the lei feng spirit and the red flag canal spirit in the great practice of revolution, construction and reform over a long period of time. Xi Jinping said general secretary in henan expedition: "every time I to the old revolutionary base areas to investigate research, to admire the revolutionary history memorial place, was telling all party comrades can't forget how red political power, the new China is how to, the happy life of today is how come of, is to show the communist party of China will always carrying red flags, walk the road of socialism with Chinese characteristics, the cause pioneered by the predecessors constantly push forward". School red culture function is the main venues, schools through various theme activities, cultivating students' unwavering revolutionary belief and hard work style, by organizing students to visit the martyrs cemetery, the former residence of celebrities, museum and other ways to let the students understand the historical stories and training firm ideal and faith. At the same time, through the red song competition and walking on mountain roads, we can experience the feelings of daring to sacrifice during the revolutionary war, and give play to the college students' innovative consciousness and spirit of unity and cooperation. The great rejuvenation of the Chinese nation will eventually be realized in the relayings of the younger generation. Young students consciously accept the edification and baptism of the red culture, and draw from the red culture the strength of belief and the deep understanding and recognition of the socialist core values of "prosperity, democracy, civilization and harmony".

5. Strengthen Ideological and Political Courses and the Construction of Teachers to Provide a Strong Guarantee for the Cultivation of Socialist Values for College Students.

Adolescent stage is the "jointing and booting stage" in life, which needs careful guidance and cultivation. Young students need to follow the law of growth, give life inspiration and spiritual strength. Strengthening the socialist core values of college students is inseparable from ideological and political theory courses and the construction of teachers. First of all, the importance of ideological and political courses to the value education of college students. It is to do the education of socialism with Chinese characteristics, is justified to open a good education courses, in the new era of the thoughts of casting the soul of socialism with Chinese characteristics education, guide students to strengthen the socialist road with Chinese characteristics confidence, confidence, system theory, the culture, strengthen the patriotic feelings, put much, power line and patriotic consciousness into the persistence and development of the cause of socialism with Chinese characteristics, the construction of socialist modernization power, strive to achieve the great rejuvenation of the Chinese nation. Ideological and political courses in colleges and universities must solve the problems of college students' outlook on life, world view and values, and strive to cultivate young people who are beneficial to the country, society and people. Second, the ideological and political theory course is the key course to fulfill the fundamental task of cultivating people by virtue. A

country without virtue cannot prosper, and a man without virtue cannot stand. Ideological and political theory courses in colleges and universities focus on students, care for students, serve students, solve problems for students to meet the needs and expectations of the growth and development of college students; But also pay attention to the young students to strengthen the moral cultivation, to have both great virtue determined to serve the motherland, serve the people and have public morality, private morality starting from small things, learn to work, learn to be diligent and thrifty, learn to be grateful, learn to help others, learn humility, learn to be tolerant, learn to self-reflection, learn to be self-disciplined. Secondly, we should attach importance to the influence of teachers on college students' values. Xi Jinping stressed that the key to running the ideological and political theory course well lies in teachers, and the key lies in giving play to teachers' enthusiasm, initiative and creativity. Ideological and political teachers, to give students heart buried the seeds of truth, kindness and beauty, guide students to buckle the first button of life. The group that universities have the greatest influence on college students is teachers. Teachers' ethics and life values will influence students imperceptibly and play a crucial role in shaping college students' personality and forming their values. This needs "the party committee of the school should insist on combining strict management with scientific management. School party secretary, President to take the lead into the classroom, take the lead to promote ideological and political course construction, take the lead to contact ideological and political course teachers. We should build a team of full-time teachers of ideological and political courses, and build a team of teachers of ideological and political courses with sufficient quantity and good quality. In this way, the main role of students can be played, and the positive values of college students can be cultivated through independent thinking and the construction of socialist core values can be promoted.
