Quality Assurance Center, Shenzhen Polytechnic, China

Abstract

Excellent teachers are good at stimulating students' learning enthusiasm and thirst for knowledge, and are good at making students firm their learning beliefs and set up lofty ideals, which plays an important role in cultivating students' All-round development. This paper discusses what kind of teacher is an excellent teacher in the eyes of students, and thinks that only by having the qualities of dedication, love for students and devoting to learning, can be a teacher liked by students and become an excellent teacher in the eyes of students.

Keywords

Excellent Teachers; Dedication; Love for Students; Devoting to Learning.

1. Introduction

Teachers are the inheritors of human civilization. To promote the sound and rapid development of education and to train high-quality talents, teachers are the key. With the continuous evolution of social civilization, education has become more and more toward the center of the society and the focus of the public. "Cultivating outstanding talents" is the starting point and foothold of running a university, as well as the most core function, and "cultivating outstanding talents" needs an excellent team of teachers. What qualities should an "excellent teacher" have in the eyes of students?

2. High-level Excellent Teachers should have at Least the Qualities

2.1. Dedication

Dedication is a fine tradition of the Chinese nation. Dedication is a valuable professional moral spirit and quality, is people engaged in their own profession highly loyalty, love and special responsibility for the comprehensive performance [1]. College teachers' professionalism means that university teachers actively carry out teaching, academic innovation and social service functions, will work as an important part of the career development education and the spirit of the students creative services, contributing to society. From the heart teachers think their career is valuable and meaningful, they can find fun, and they will regard education as a career to realize the value of their life, rather than just a career to make a living, thus generating internal motivation for conscious growth [2]. The professional dedication of college teachers is not only directly related to their own professional growth, the development of national higher education, but also related to the growth of college students.

To be dedicated, on the one hand, we should be able to teach, not just to speak, but to be good at guiding students to learn in many ways, so that students can play their own heart according to the learning methods taught by teachers, using their eyes, ears, mouth, brain and hands to acquire knowledge and improve their ability. Multiple guidance, refers to the teaching activities, such as how to introduce the new lesson to stimulate the interest; how to ask questions; how to make the finishing touch on the blackboard, to deepen the summary; how to explain in depth and in simple ways to induce exploration; even how to use classroom language, answers to

questions, bridging phrases, exercise designs, etc. [3]. That is to pay attention to elaborate design and implementation from the guidance, in order to ignite the fire of students' thinking, to teach students how to learn, is good at inducing. On the other hand, there must be a strong sense of responsibility, dedication and a diligent teaching attitude. Teachers should face the responsibility of the post, be a model for students, love their jobs and work hard, teach earnestly and educate people carefully. In the face of social responsibility, teachers should work actively and diligently, so that they can teach students how to recognize, survive, work and cooperate, be willing to contribute, and teach students in accordance with their aptitude and teaching tirelessly, so that they can become useful talents for national construction.

2.2. Love for Students

A teacher is a walking power, a smile, a look may be printed in the hearts of students, whether it is the transmission and expression of knowledge or emotion, there is no reason for teachers not to treat student's kind in one hundred percent, a good teacher must be the important person of students.

Teacher's love is a touch of warm sunshine projected to the students' hearts, is a burning torch to shine on the students, is a shining golden key to open the treasure house of knowledge to guide the development of students. Teachers should take students as a personality, have ideal, gifted, have different pursuit, have different dreams, everything should be for the sake of students. Teachers can truly care for students from the following aspects.

2.2.1. All-round Education

University is a very important stage before the students go to society; they suffer from the pressure of academic, personal, emotional, finding a job. Teachers not only teach students the way of learning, but also teach students working way and the way of living. Teachers can cultivate students with profound professional level, proficient skills and noble thoughts and morals through the whole curriculum of "major + practice + skills". It promotes students to learn professional knowledge and skills, and at the same time increase their understanding of the national conditions, industries and society, so as to realize their ideals and aspirations in practice.

2.2.2. Excellent and Efficient Class

First, the content of the lecture should be attractive. Rich and colorful lecture content will naturally attract students' attention, stimulate students' desire to learn, improve students' interest in learning. Teachers should make full preparation before class, carefully organize the teaching content, supplement a lot of things outside the textbook, introduce some realistic and vivid cases into the classroom teaching, and tightly grasp the core and soul of the lecture content. Only in this way, teachers can give students with their own thoughts to inspire, let the classroom become a collision of ideas between teachers and students, rather than simply read from the book. Only in this way can teachers give lectures with a focus and a simple explanation. Second, teach with passion, interact with students, and strive to make your lectures flow smoothly. Before going to the classroom, teachers should brew good emotions, fully release their energy, and show the teacher's appeal, penetrating power and guiding power to the best of their ability. Let the class become a process of mutual communication and mutual appreciation between teachers and students. Once the teacher lectures full of passion, the teacher can use their own passion to trigger, stimulate the passion of the students, the class is full of vitality, the students learn easily and happily.

Third, teachers should be good at thinking and summarizing. The teacher should summarize in time after class, especially the inadequacies, to accumulate experience for improving the follow-up classroom teaching. The teaching process of teachers should be a creative process of constant thinking. Thinking can generate passion, and passion can spark wisdom. Such a

classroom can become a palace for teachers and students to pass on wisdom. At the same time, teachers should be good at discovering the burning point of students' thinking, and help students discover it, ignite it, so that it becomes the lamp of students digging their own spiritual treasure, illuminating students all the way forward.

2.2.3. Cultivate Students' Abilities

Teachers should pay attention to the latest research trends of their profession and industry at home and abroad, which can be used as supplementary materials for classroom teaching to stimulate students' interest in learning. Teachers should integrate scientific research methods, especially critical thinking methods, into the teaching process, which is beneficial to cultivate students' independent thinking ability, improve their innovative spirit and scientific literacy, which is especially important for senior students. Teachers should encourage students to put forward new questions and new ideas in class teaching, and encourage classroom discussion, which is conducive to stimulating students' innovative ability.

2.3. Devoting to Learning

Today, the knowledge update speed fast, human society is moving forward to the learning society. As a teacher, only through continuous learning and receiving education, can make the education idea constantly update, teaching methods constantly change, knowledge structure constantly improve and upgrade, can cultivate students with innovative spirit and practical ability [4]. It is beneficial to improve teachers' teaching quality and academic level, to improve teachers' teaching art and professional level, and to forge teachers' noble character. Students need a glass of water, and teachers should be a living spring. Only when their own knowledge is fluid and updated can they bring students fresh knowledge, and at the same time, they will shorten the psychological distance with students. Only in this way can a teacher become an excellent teacher in the eyes of students.

3. Conclusion

What teachers say and have deep influence on the students and education, teachers respect and love education career, teachers go out of their way to be good to their students, teachers continue to learn their own subject expertise, and through extensive reading, dabbled in various areas of knowledge, at the same time pay attention to the study of classic, accumulate their own humanities accomplishment and inside information. Only in this way can teachers satisfy students' desire for knowledge and be loved by students and become excellent teachers in students' eyes.
