Abstract

The development and management work of college student party members is an important basic work of party building in colleges and universities, under the new environment, the development and management quality of college student party members must be continuously improved. This paper analyzed the current problems in the development and management of college student party members, set forth the importance of college student party members' development and management under the background of full and strict governance over the party, and explored the current effective methods of development and management work of college student party members in combination with actual work conditions.

Keywords

College Student Party Members; Strict Governance Over the Party; Development and Management.

1. Introduction

Since the 18th National Congress of the Communist Party of China, the full and strict governance over the party is the new situation and new problems that the Party Central Committee with General Secretary Xi Jinping at the core is facing in party building based on new historical conditions. Colleges and universities are important places for the development and training of college student party members, moreover, development and management work of party members as an important part of college party building work, under this background, the development and management work of college student party member needs to continue to develop based on students' characteristics and the needs of the times.

2. The Importance of Strengthening the Development and Management of College Student Party Members under the Background of Full and Strict Governance over the Party

1. As an important part of society, young students shoulder the important task of the development of the times and the great rejuvenation of the Chinese nation, they more need to strengthen their ideal and beliefs. General Secretary Xi Jinping pointed out at the 100th Anniversary of the Founding of the Communist Party of China: "youth is the most active and dynamic force in the whole social forces, the hope of the country lies in the youth, and the future of the nation lies in the youth." As an important training place of young college students, colleges and universities shoulder the important mission of fostering virtue through education, the development and management effect of college student party members also indirectly affects the development and continuation of the Communist Party of China. It is very important for colleges and universities to implement full and strict governance over the Party.

2. Advanced nature and purity are the fundamental characteristics of the Marxist party. The 18th National Congress of the Communist Party of China proposed to "firmly grasp the main line of strengthening the construction of the Party's governing ability, advance nature and purity", bring the building of purity into the main line of party building for the first time. The education and management of college student party members more need to raise the requirement, only by cultivating reliable successors from the source can we ensure that the party's advanced nature and purity are always maintained [1].

3. Facing the complex international environment and the new era background, the external hostile countries continue to infiltrate our country, college students generally have strong thirst for knowledge and curiosity, but their awareness and ability to distinguish right from wrong are not enough. Facing the impact of multiculturalism and values in the world today, college students are prone to be confused, have deviations in their thinking, and even are induced to use by hostile forces [2]. College student party members must strictly require in the process of development and management to ensure that the party spirit is pure.

3. Current Situation of Development and Management of College Student Party Members

3.1. Party Spirit Cultivation Needs to be Further Improved

The motivation of student party activists to join the party is directly related to the purity, advanced nature, and overall quality of student party members. The motive of joining the party is an important criterion to be measured when developing party members, at present, the motives of students joining the party are complicated and difficult to control. The motive of some students to join the party are speculative, utilitarian, vain, and conformity, the responsibilities and obligations of party members are ambiguous [3], and they are not timely enough to learn advanced knowledge of the party.

3.2. The Development of Party Members Needs to be More Standardized

In April 2014, the General Office of the Central Committee of the Communist Party of China made and issued the "Working Details of the Development of Party Members of the Communist Party of China" in combination with the new situation, clearly proposed "control the total amount, optimize the structure, improve the quality, and play a role" to the whole party [4], but there are still differences in the process of developing party members in different colleges and universities, and the development standards among colleges are not uniform, there are limitations in student education, and the training contents are not rich enough, moreover, in the process of developing party members, the advanced nature of party members are incompetent, and the political consciousness of individual party members is slow to improve.

3.3. The Follow-up Training of Party Members is not Full Enough

In the management process of college student party members, there is not enough attention to party members, college student party members are generally not active enough in party life, in the process of training, they pay attention to form and content, but do not pay attention to the learning effect of party members, for example, ideological reports are mostly online excerpts, and lack personal learning experience on politics or current events of the party and the country. Moreover, party member education and training methods do not pay enough attention to innovation, for party members of college students in different periods, various methods should be used to organize party life regularly with multi-party educational resources, blindly opening the conference and studying documents will only get half the result.

4. The Exploration of Work Path of Development and Management of College Student Party Members under the Background of Full and Strict Governance Over the Party

4.1. Do a Good Job in the Development of College Student Party Members Conscientiously

Doing a good job in the development of college student party members should adopt different education for different objects, the party enlightenment education, ideal and belief education, socialist theory with Chinese characteristics, core socialist values and other subjects should be set up in the freshman education, college party and government leaders, outstanding branch secretaries, and outstanding party members are invited to teach party classes for college students, so that students can truly feel the firm belief of the Communist Party of China, and promote the enthusiasm of young students to join the party[5]; secondly, we must attach importance to the education work of activists who join the party, make students study the party constitution seriously through the process of party class learning and training, study the party history conscientiously and improve themselves from the development of the party. It is necessary to strictly control the contents of party school examinations and fully master the students' grasp of party knowledge.

4.2. Strengthen the Education and Management of College Student Party Members

(1) Pay attention to the education and management process of college student party members, the education and management of college student party members is not the staged behaviors, but continues to advance with the development of the growth process of students, strengthen the political steadiness of college student party members and improve the theoretical arm, it is necessary to combine the "two studies and one doing", study and education are normalized and institutionalized, organize party members to discuss and study together, and integrate theory with practice, and follow up and learn knowledge in time. Strengthen the study and education of party history, contemporary college students are all born in peaceful times, make them experience the suffering experienced by the older generation of party members for the country and the people, cultivate the revolutionary spirit and heroic spirit of the students, and help them set ambitious target of working and fighting all their life for communism.

(2) Innovate educational management way, carry out the education and management of college student party members in a more flexible and vivid way, organize students to watch excellent red-themed movies, experience red-themed activities, etc., help students further understand the struggle of the older generation of revolutionary fighters, and pave the way for further theoretical education. It is necessary to make full use of the new media platform during the training period, and launch a series of online themed education contents through online party classes, micro party class videos, and WeChat public platforms to occupy "micro time".

(3) Highlight purity education, strengthen the party spirit of college student party members, strengthen learning and education through key time points, keep college student party members ideologically pure, and train college student party members to continuously "innovate, reflect, and purify themselves." Guide college student party members to face their own problems, facing the problems around them can ensure their pure style, as the outstanding student representative, lead the students around to create a good atmosphere and truly lead by peers.
