Abstract

The construction of college student community is an organic part of the education of colleges and universities, and it is an important place to conduct the empirical study and life work of college students. The college student community has an indispensable position in sharing the responsibilities of educational administration and management of colleges and universities, and the mode of training innovative talents. Building and optimizing the education system for the development of college student community behavior and habits has gradually become a part of college education reform. This essential content is not only directly linked to the improvement of the university's own governance level and comprehensive quality, but also directly related to the accomplishment and full implementation of the fundamental task of cultivating talented people. This article starts from the perspective of college students' behavioral habit formation education, and on the basis of defining the relevant concepts and theoretical basis of college students' behavioral habit development education in the college student community, combined with the current status of the college student community, sorts out the difficulties faced by the college student community with problems and solutions. The active community for all college students in colleges and universities is the principal public place and activity place for all kinds of study, life, work and rest that college students often carry out during their time in school. It is an important activity position to train students to organize discipline, establish a sense of teamwork among students, and advocate social civilization and etiquette.

Keywords

College Student Community; Community Behavior and Habits; Formation Education.

1. The Basic Connotation and Significance of the Behavioral Habits of College Students in the Student Community

1.1. The Basic Connotation of the Behavior Habits of College Students in the Student Community

1.1.1. The Concept of Student Community

With the development and deepening of the structural reform of my country's higher education management system, the socialization of the college student community and the gradual establishment and implementation of the credit system for vocational classes, as the main body of our country's traditional college student community class self-learning and other social organizations to carry out activities. The concept of administrative class with grassroots units gradually fades, the student community gradually develops into a social basic unit that spends a long time with other students on the university campus, and the traditional concept of student class is gradually replaced by dormitory masses and collectives. The mass community of college students established by dormitory group units is developing into an important place for the majority of students in terms of autonomy, outlook on life, cultural feelings, social relations,

team spirit, etc. A new period of space for developing ideological and political curriculum education.

1.1.2. The Meaning of Education for College Students' Behavior and Habit Formation based on the Student Community

For college students, the student community is the longest space outside of the classroom, which has an important impact on the development of college students' behavior and habits in the student community, students' self-education, and mutual influence on the exchange of ideas in the student community, and behavioral habit formation also often occurs in the community. This has a great influence and determinant on the formation of college students' behavior habits. For contemporary Chinese college students and communities, how to strengthen the education management of college students, especially how to strengthen the education of college students and the community to develop the behavior habits of college students in my country, to develop the construction of college students and communities in my country into an educational base with rich cultural literacy atmosphere, cultivating students' sentiment and correct morality that integrates the functions of "safety guarantee, ideological education, academic counseling, cultural construction, life service, and code of conduct".

1.2. The Significance of the Education of College Students' Behavior and Habits in the Student Community

1.2.1. Strengthening the Education of Students' Community Behavior and Habits is an Objective Requirement for the Safety Guarantee of Contemporary College Students

Strengthening the education of students' community behavior and habit formation is a good objective requirement to ensure the safety of contemporary college students. With the correct student community habit education, students can actively guide students' awareness of safety awareness and the implementation of behavior habits. The dormitory does not use high-power electrical appliances for dormitory dinners. The hair dryer also needs to be used in the student dormitory with appropriate power. The student dormitory will also limit the electrical power during the construction process. If the electricity rate is exceeded, it will be skipped. Registration can be used to restart the power supply. Therefore, it is of great significance to strengthen the development of college students' behavior and habits in the student community for the safety of contemporary college students.

1.2.2. How to Strengthen the Development of College Students' Community Behavior and Habits is an Inevitable Need for the Reform of the Educational System in Colleges and Universities

Student education plays an important and decisive role in the education system of colleges and universities, and the education on the development of behavior habits of the student community has a key influence on the education of students. Therefore, the cultivation of behavior habits of the student community is of great significance to the reform of the education system in colleges and universities. For example, organize students to conduct dormitory civilized appraisal activities, comprehensively improve students' civilized student community behavior habits, and then affect the formation of college education system to carry out the reform process of renewal and iteration.

1.2.3. Strengthening the Education of Students' Community Behavior and Habit Formation is the Inherent Requirement for the Correct Guidance and Development of Positive Behavior Habits of Students' Community Cultural Literacy

Behavioral habits have both positive and negative influences. How to strengthen students' community behavioral habits development education has inherent requirements and

significance for students to establish correct community cultural literacy and positive behavioral habits.

Strengthening the awareness-raising education for college students to develop community management behavior habits has important and far-reaching social, historical and strategic significance for vigorously cultivating contemporary my country to achieve the great cause of the Chinese nation's revival and epoch-making outstanding new talents.

The student community has a significant influence on the behaviors and habits of students, and the development of the behavioral habits of college students means that the development of the behavioral habits of the successors of the great rejuvenation of the Chinese nation in the future will affect a trend and wave of the future society.
