### Abstract

**College students join the Party activists is an important source of student party members, from the source to strengthen the cultivation of their party character, but also to further strengthen the student party members of the party's important parties, pay attention to the ideal and belief education, strengthen their own ideological and moral cultivation and the construction of the Party branch secretary team are of great significance to the training of college students into the party activists.**

### Keywords

**College Students Join the Party Activists; Party-type; Cultivation Path.**

### 1. Introduction

College students joining the Party activists refers to college students over the age of 18 to the Party branch of the party formally submitted to the party branch application, recommended by the branch of the league, branch general meeting research to determine as the object of development for planning and training personnel. The Rules for the Development of Party Members of the Communist Party of China (CPC) propose that in determining the number of party active elements among the applicants for membership in the Party, candidates shall be chosen by means of party members' recommendations, group organizations and so on, and a branch committee (which does not have a branch committee shall be decided by the branch assembly) and reported to the higher party committee for the record. In recent years, colleges and universities have become a solid position for the transmission of Party members. With the gradual increase in the number of college students applying to join the Party, and the education of student party members and party activists has no special staff, according to the survey research shows that 68.6% of college student party branch secretaries are appointed by college counselors, counselors to be busy with the day-to-day management of students, coupled with many counselors themselves academic non-ideological and political education professional graduation, lack of professional study, the student branch and the party's theoretical research level and understanding is not thorough enough, This will affect the construction of the student party branch and the educational quality of the student party members and party activists. As an important source of Party members, the quality of Party members and the cultivation of Party nature have attracted more and more attention. At present, our group of college students mainly to "after 90", "after 00" as the main, in the personality more distinct, independence and autonomy more prominent. "After 90" and "after 00" and generally with only children, coupled with the international and domestic gold worship, hedonism and the influence of capitalist ideology, the lessons of the death of the Communist Party of the Soviet Union, strengthening the ideological and political education of contemporary college students and the cultivation of the Party has a long way to go. It is necessary to strengthen the Party-oriented cultivation of college students' activists, attach importance to the education of ideals and beliefs to train college students' party activist patriotism, red culture and so on to guide college students' party activists, strengthen their ideological and moral cultivation, and constantly strengthen the

cultivation effectiveness of college students' party-oriented cultivation, and build the party branch secretary team to provide guidance for college students to join the Party activists.

## **2. Strengthen the Education of Ideals and Beliefs, and Cultivate the Firm Determination of College Students to Join the Party Activists to be Loyal to the Party**

Young people's lofty ideals, firm beliefs, is a country, a nation's unbreakable driving force forward. In order to train the new people of the era of national rejuvenation, it is necessary for the Chinese youth in the new era to establish their faith in Marxism, their confidence in socialism with Chinese characteristics, their confidence in the great rejuvenation of the Chinese dream of the Chinese nation, to go among the masses, to the new world of the new era, to sublimate their ideals and beliefs in the struggle for entrepreneurship, and to let youth shine in innovation and creation. First of all, to cultivate the ideals and beliefs of college students to join the Party activists should strengthen patriotism education. The Outline for the Implementation of Patriotism Education in the New Era points out that patriotism is the national heart and soul of the Chinese nation, the most important spiritual wealth of the Chinese nation, and a powerful spiritual driving force for the independence and dignity of the Chinese people and the Chinese nation. Colleges and universities as the core of students' patriotism education, let students understand the standards and norms of patriotism, take a variety of educational practice activities, and truly turn patriotic emotional identity into practice and behavior habits, so that patriotism in the heart firmly rooted, requires every college student to promote national unity, safeguard the reunification of the motherland, consciously serve the motherland as their own responsibility. Secondly, pay attention to the importance of red culture to the cultivation of the ideal and belief of college students to join the Party activists. General Secretary Xi Jinping said during his visit to Henan: "Every time I visit the old revolutionary areas to study and investigate, I look up to the revolutionary historical memorial site, that is, to warn the whole Party comrades not to forget how the red regime came about, how the new China came about, how today's happy life came about, is to declare that the Communist Party of China will always hold high the red flag, firmly follow the road of socialism with Chinese characteristics, and push forward the cause created by the forefathers." The school is the main place where the red culture plays its function, the school cultivates the unshakable revolutionary belief and hard work style of the party activists through various thematic practice activities, lets the party activists understand the historical story and cultivate the firm ideal belief through the way of the martyr's mausoleum, celebrity's house, museum, etc. The great rejuvenation of the Chinese nation will eventually be realized in the relay struggle of the young generations, and the party activists will consciously accept the edification and baptism of the red culture, draw the power of faith from the red culture, and cultivate the firm determination of the university students to join the party activists to be loyal to the party.

## **3. Strengthen Their Own Ideological and Moral Cultivation, Strengthen College Students into the Party Activists of the Party's Cultivation Effectiveness**

The Outline for the Implementation of The Construction of Civic Morality in the New Era puts forward that schools are an important position in the construction of civic morality. We should fully implement the Party's educational policy, adhere to the socialist direction of running schools, adhere to the education of people-oriented, moral education first, we should take ideological and moral character as the core quality of students, into the academic quality standards, and build a comprehensive training of moral, intellectual and physical beauty and

labor education system. We should continue to guide college students to join the Party activists correct moral cognition, self-conscious moral cultivation, positive moral practice closely combined to do a new era qualified socialist builders and successors. Since the 18th National Congress of the CPC, the CPC Central Committee has paid constant attention to the construction of the ranks of student party members. At this stage, the group of college students has become the main force of the party team. Influenced by many factors, such as thought, environment and society, the original intention of college students to join the Party is diversified. In Sichuan University of Light Chemical Engineering, for example, nearly one-third of the students joined the Party with incorrect intentions. The motivation to join the Party is extremely important, and General Secretary Xi Jinping has pointed out that "to develop new Party members, we must carefully analyze the motivation, strictly grasp the standards and procedures, ensure quality, and avoid bringing disease into the Party". As an important way to correct the motivation of college students to join the Party, the training process should adopt various forms to correct the motivation of the party activists to join the Party. Strengthening the training of Party courses, carrying out a variety of theoretical learning activities, organizing talks can correct the motivation to join the Party, and with the development of science and technology, the education about the theoretical knowledge of party activists should also keep pace with the times, in addition to using a single curriculum teaching model for ideological guidance, but also personalized education The use of multimedia means, with a richer form to strengthen the training of theoretical practice. For example, the use of WeChat public number, micro-blog and other online platforms.

Party activists are high-quality candidates to become full members of the future, a qualified party member needs to have many abilities. The process from activist to full member is a process of deepening theoretical practical ability, reshaping its own value system and pursuing excellence. Among the personal qualities that party activists should possess, academic achievement and comprehensive quality are crucial to student development, accounting for 18.58 percent and 17.82 percent, respectively Students believe that organizational and business skills are also key factors to be improved, 16.35 percent of students believe that developing personal qualities also requires innovation, and 11.78 percent of students believe that the usual performance is also a certain position in personal literacy. Becoming a Party activist is not the end of strengthening one's own ideological and moral cultivation, but the beginning of self-conscious learning. College students can improve the Party's character cultivation by consulting on the Internet or borrowing relevant books from the library, participating in Party building topics to improve the Party's cultivation, and studying in the field, such as the base of clean government. Accessing the Internet or borrowing books from the library is the easiest and most convenient way for students to improve. Participating in Party building subjects has a relative advantage for liberal arts students, and science students are less exposed to such subjects. There are not many opportunities to study on the ground at the Integrity Base. Therefore, in addition to consciously strengthen their own ideological and moral cultivation, colleges and universities should also provide students with more ways to learn. After becoming a party activist, we need to organize an exchange seminar every quarter to maintain their party's cultivation should pay attention to the theoretical knowledge reserve, should keep the study to maintain their party's cultivation, in the bedroom to lead roommates to jointly enhance the ideological realm can maintain their party's cultivation, students think that regularly write ideological reports to maintain their party's cultivation. Students generally believe that the above four methods can maintain their own party culture, but slightly more emphasis on the amount of knowledge and continuous learning.

#### **4. Strengthen the Construction of the Party Branch Secretary Team in Colleges and Universities, for College Students to Join the Party Activists to Provide a Strong Guarantee for the Cultivation of Party-oriented Cultivation**

General Secretary Jinping Xi made it clear at the Party's construction work conference of the central and state organs that "a clear orientation should be set up to grasp the grass-roots level", adhered to the principle of "secretary grasping and grasping secretary" and raised high expectations for party branch secretaries. As the first person responsible for the Party branch, the branch secretary must do what General Secretary Xi Near Ping called for "political understanding, the party building work of the insiders." The secretary of the Party branch of a university plays an irreplaceable role in the construction of the party branch of college students. According to the investigation and research, nearly two-thirds of the student party branch secretaries in colleges and universities are appointed by college counselors, who are busy with day-to-day management, and some counselors graduate from ideological and political education majors, lacking professional learning. First of all, the party branch secretary of colleges and universities should have a strong sense of position, take the student party branch, always grasp the right direction, consciously enhance the "four consciousness", firm "four self-confidence", resolutely do "two maintenance", to ensure that the student party branch always follow the right direction. Secondly, do a good job of leading learning, taking the lead, and effectively play an exemplary role. The secretary of the student party branch should not only accept the above and the above rate, but also play an ex-role. General Secretary Xi Jinping pointed out that "political firmness and party firmness cannot be separated from theoretical firmness". Party branch secretaries must take the lead in learning xi Jinping's new era of socialism with Chinese characteristics, truly learning truth and faith, really understanding the use of truth, strict self-discipline, lead by example, and constantly improve the theoretical level of branch secretaries. Finally, effectively carry out the work of the branch secretary to strengthen the guidance and training, to promote its business level, training innovation, decision-making, organization and coordination, implementation and other capabilities. According to the status quo of the construction of the Party branch secretary team, we should analyze the status and role of the party branch secretary in colleges and universities, improve the comprehensive quality of the party branch secretary, broaden the learning methods, strengthen the comprehensive training of the party branch secretary, actively use information technology to establish a network learning platform, use network resources to improve the overall construction level of the party branch secretary, and promote the effective development of the Party branch construction work.
